# Call for EDITOR

The editorial team of the Database of Variables for Content Analysis (DOCA) invites researchers with expertise in automated content analysis to apply for a position on the DOCA editorial team.

## Who are we looking for?

We are looking for a communication and media researcher with expertise in **automated content analysis** who is interested in contributing to the further development of DOCA.

**Your role will include:**

- Contributing to the strategic direction and further development of DOCA
- Supporting the development and integration of variables and methodological standards related to automated content analysis
- Participating in the review process for submitted DOCA variables

**Expected commitment:**
approximately **2 hours per month;**
participation in online editors' meeting

**What we offer:**

- Collaboration within an engaged and international editorial team
- An editorial role in an established and widely recognized database for content analysis
- The opportunity to actively contribute to **Open Science** in communication and media research
- The opportunity to help shape methodological standards for automated content analysis within DOCA

For questions or if you are interested in joining DOCA as an editor, please send a short email outlining your motivation to

franziska.oehmer-pedrazzi
@mileva-institut.ch

**What is DOCA?**
The open-access database DOCA is a methodological infrastructure that compiles, systematizes, and critically evaluates content-analytical variables used across communication research. In doing so, it serves as the basis for how variables are developed and operationalized.
DOCA is part of the MEDEM data network.
